**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-2, 12-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Shaffer et al. (US 7,023,839 B1, hereinafter "Shaffer").

Regarding claims 1-2, 12-13, Shaffer discloses a system for operating a multimedia communications network, comprising:

at least two endpoints (H.323 terminals 102A, 102B) and at least one registration unit (bandwidth adjustment server 109) wherein, after the arrival or authorization of a call, a call status request message is transmitted by one of the registration units to at least one of the two endpoints involved in the call (BWAS sends a message to the user terminals, requiring them to identify their coding capabilities and the specific hierarchy used by them (col. 1, line 64 – col. 2, lines 8)).

***Allowable Subject Matter***

3. Claims 3-11, 14-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
